

BASELIGHT 420X

GR technics is the exclusive distributor of the BASELIGHT for the Benelux. A fast portable intervention mast that can easily be set up by 1 person in 30 seconds. This light unit can be used in all calamities and is therefore very popular by the police, fire brigade, civil protection and all kinds of rapid intervention services. Thanks to its compact shape and lightweight, the BASELIGHT is taken everywhere. Its wheels also facilitate transportation. This light pole is equipped with powerful LED lamps that can be directed separately. Can be used both indoors and outdoors, even at extreme temperatures. The BASELIGHT is connected to a 240V power supply, generator or inverter 12V/240V.
