

STALICO CO² NEUTRAL ECOLIGHT 8.5 M

The STALICO Co² Neutral Ecolight is the most sustainable light pole on the market. Ideal for lighting without generator, filling up or power supply for independent and noiseless use on the move. With a battery of for example 720 Ah 48 V, this light pole guarantees up to 100 hours of autonomous operation and the most CO-neutral lighting of your site. The innovative light pole container can be moved, stacked and hoisted. It is very stable and can be erected by one person.
