

## GR BATTERY PACK

The BATTERY PACK supplies energy for LED lighting, mobile cameras, communication towers and serves as a separate and mobile energy source. This BATTERY PACK for light and camera poles is noiseless and has 0% emissions during use. Charging takes place on mains voltage or from a generator. Charging stops when the battery pack has charged. The charger starts again if the batteries have been emptied by consumption from the light or camera. The BATTERY PACK sits perfectly with the sustainable philosophy of GR Technics, offering 60% CO2 reduction.

### SPECIFICATIONS

- Average DC charging: 1680 Watt
- Battery pack: 8 x 200 Ah AMG 12 V
- Weight: 560 kg
- Dimensions: 125 x 65 x 95 cm
- Contacts: CEE
